Professional Summary

Final-year B.Sc. Computer Science student (CGPA 9.78/10) with strong hands-on experience in full-stack web development using the MERN stack, Python/Flask, and REST APIs. Built 8+ projects including an AI-powered civic platform, a real-time social music app, and multiple responsive web applications. Proficient in both frontend (React, HTML, CSS, Tailwind CSS, JavaScript) and backend (Node.js, Express.js, MongoDB, MySQL) development. Seeking a Full Stack or Web Developer role to build scalable, user-focused applications.

Technical Skills

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, JavaScript (ES6+), Responsive Design

Backend: Node.js, Express.js, Python, Flask, PHP, REST API Design

Databases: MongoDB, MySQL

Full Stack: MERN Stack, Socket.io (real-time), Zustand (state management), Clerk (auth), Cloudinary

Python & Data: Pandas, NumPy, Matplotlib, Scikit-learn, Machine Learning basics

Tools & Platforms: Git, GitHub, Postman, VS Code, Tableau, Power BI

Projects

UrbanPulse — AI-Powered Smart City Governance Platform — *React · Node.js · Express.js · MongoDB · Tailwind CSS · OpenRouter AI*

- Built a full-stack civic issue management platform; citizens submit geo-tagged reports with image uploads (Cloudinary), and officers manage, assign, and resolve issues through a structured workflow.
- Developed role-based dashboards for 3 user tiers (Citizen, Officer, Admin) with real-time status tracking, activity logs, community voting system, and analytics dashboard.
- Integrated OpenRouter AI for intelligent issue categorisation and auto-routing; added OpenCage API for GPS-based location tagging and a Carbon Footprint Calculator module.

Moodify — Real-Time Social Music Platform — *React · Node.js · MongoDB · Socket.io · Zustand · Clerk*

- Developed a full-stack social music platform with Socket.io WebSocket integration displaying friends' currently playing songs and mood status in real time, without page refresh.
- Managed complex application state with Zustand; built mood-based diary entries, like/unlike song interactions, and persistent user data stored in MongoDB.
- Integrated Clerk for secure authentication and session management; designed responsive UI focused on engagement and low-latency WebSocket event delivery.

Note Keeper Application — *React.js · Component-based Architecture · State Management*

- Built a fully functional note management app with add, edit, delete, and search functionality using React component architecture and local state management.
- Implemented clean, reusable component structure with prop drilling and controlled inputs; focused on responsive layout and smooth user experience.

React Todo List Application — *React.js · CRUD · Responsive UI*

- Created a responsive task management app with full CRUD operations, reusable components, and filter-by-status functionality (All / Active / Completed).

Quiz Game — *HTML · CSS · JavaScript*

- Built an interactive quiz application with multiple-choice questions, dynamic score tracking, timed questions, and real-time feedback using vanilla JavaScript DOM manipulation.

Mini Web Applications & Responsive Websites — *HTML · CSS · Tailwind CSS · JavaScript*

- Designed and developed 6+ projects including Rock Paper Scissors, Word Scramble Game, Flower Shop, Coffee Shop, Restaurant website, and Brain Minds School website.
- Applied responsive design principles, CSS Flexbox/Grid layouts, and cross-browser compatibility across all projects; focused on clean UI/UX and mobile-first approach.

Customer Service Chatbot — *Python · NLP · Flask · Scikit-learn*

- Developed a hybrid NLP chatbot with ML-based intent classification, TF-IDF FAQ retrieval, sentiment-aware escalation, and a Flask REST API backend.

Experience

AI Development Intern (Virtual)	Codec Technologies	2024 · 1 month
- Built AI chatbot workflows using prompt engineering; designed reusable prompt templates for LLM API integrations and evaluated model outputs for production reliability. - Gained hands-on experience with AI API integration, parameter tuning, and chatbot pipeline design.		
Data Analyst Trainee (Virtual)	Excelerate	2024 · 2 months
- Cleaned and analysed datasets of 10,000+ rows in Excel; built 3 interactive Tableau and Power BI dashboards tracking sales KPIs, trend analysis, and regional performance. - Delivered insights reports identifying top-performing segments; applied cohort and funnel analysis to support business decision-making exercises.		
Leadership & Communication Intern (Virtual)	Nobel Learning PBC	2024 · 2 months
Coordinated intern team deliverables and presentations; strengthened project management and stakeholder communication skills relevant to collaborative development environments.		

Education

B.Sc. Computer Science	Mumbai University · Annasaheb Vartak College, Vasai(W)	2023–2026
CGPA: 9.78 / 10 Sem 1: 9.6 · Sem 2: 10 · Sem 3: 9.8 · Sem 4: 9.7 · Sem 5: 9.55 · Sem 6: 10		
Advanced Diploma in Software Engineering	Itech Computer Education	2024–Present
HSC (Class 12)	Annasaheb Vartak College · Maharashtra State Board	2023 · 90.00%
SSC (Class 10)	J.B.S High School · Maharashtra State Board	2021 · 98.60%

Certifications

- Deloitte Australia** — Data Analytics Job Simulation (Forage)
- Data Science Bootcamp** — GeeksforGeeks
- Diploma in Python Programming** — Alison
- Artificial Intelligence Fundamentals** — GreatLearning
- Introduction to Generative AI** — Simplilearn

Achievements & Leadership

- 1st Prize — Technical Quiz Competition, Techthon 2025, Atharva College of Engineering
- Core Team Member — Inter-Collegiate Technical Event (Techathon 25), Vartak College
- Head Girl — J.B.S High School; led coordination across school departments
- Participant — Avishkar Research Convention, Mumbai University (2024 & 2025)
